

Teacher Training with NFP International

Teaching NFP can actually be **fun** because interested couples really appreciate what they learn.

Teaching NFP is also a **challenge** because some of our students wouldn't be in class unless they were required to be there as part of their preparation for Christian marriage. Upon the recent completion of our NFP course, the couples' unsolicited reaction was amazement at how much they had learned.

Teaching Systematic NFP is **important** because it provides the practical help needed to live out the teaching of *Humanae Vitae* against contraception. Teaching Ecological Breastfeeding as a form of NFP is **important** because it helps couples to understand and use God's own built-in plan for spacing babies.

Teachers of NFP need to believe Catholic teaching about conception regulation and they need to practice what they teach, and they want to make a difference for the better.

If you and your spouse want to make a difference in your community by teaching NFP as a volunteer teaching couple, please send us your name, postal address, phone and email address to the email below. We will get back to you promptly with more information about becoming trained to teach the complete approach to NFP with our organization.
